Hello Everyone,

I have received a photo of a V24 vacuum tube.
On it is marked:
Marconis W.T. Co. Ltd.
Patt 28413-13

Was this tube manufactured in the UK? Was it some variant of the Marconi company?
The letter S on the end of the Marconi name is throwing me off.

Jerry - Marconi named his co. Marconi's Wireless Telegraph Co. Ltd in 1900, and the name was used until 1963. The strange looking tube would be common to a British collector. Its circa WW 1.
See History of the British Radio Valve to 1940 by K. Thrower.

Hi Will,

Thanks for the decode. The apostrophe is not there in the name which is marked on the tube .

Dave,
Here's my bits of ARC-4:

RT-19/ARC-4
NXsa-12591
12589 CW

J-23/ARC-4
NXsa-12591
25393-CW

C-52/ARC-4 A (A is stamped)

NXsa-46025
2172 CW

None of my crystals have any data,all are Western Electric.

The dynamotor is the ARC-1 dual voltage one,(no details unless I open up the radio).

Non of my manuals, or copies of, refer to contract numbers.although one Preliminary Instruction Bulletin for 233A RADIO TELEPHONE EQUIPMENT has serial no. 4138 and is hand marked UNCLASSIFIED (8-13-47).

I'll have to do some serious digging to get to all the ART-13 bits.

Jay KE6PPF

Hi Will,

The person who provided the V24 tube photos also indicated that I have the =
piece of equipment where it was used featured in one of my pages:

http://www.jproc.ca/marconi/detector_amplifier.html

It would appear then, that the newly minted "The Marconi Wireless Telegraph=
Co of Canada" (no affiliation with Marconi UK) procured the V24 from "Marc=
oni's Wireless Telegraph Co. Ltd".=20

Marconi Wireless Telegraph Co of Canada would go on to become Canadian Marc=
oni in 1925. It remained as a separate company only sharing the Marconi nam=
e. =20

Hi, Gang

I received a new catalog from Antique Electronic Supply.

I nearly swallowed my chewing gum when I saw a listing for "Jupiter" brand Cryo HT Beeswax paper capacitors.

Yes, they have reproduced the old, failure prone wax tubulars, at a price of only \$28.20 each for 0.047uF 600V.

Maybe the use of beeswax makes for a sweeter tone.

73,
Ed Knobloch

Hey, hey, Ed

None of your beeswax!

It there are sheep waiting to be shorn, and AES knows how to shear them, why, that's the American way. A predator should be allowed to pursue prey. That's what free markets are all about. Sure, it seems like free markets allow the richest to buy up all the markets, but there's still those niches, like wax caps.

Don't be criticizing the American way of rapaciousness. All those who

have money in 401K plans would be lost without it. People get rich from other people's greed; you should, too.

[Please don't think that was anything but painful sarcasm.]

Bill Hawkins

Well, thanks to everyone who offered helpful hints regarding my quest for an early commercial VFO controlled transmitter. Obviously there were few before the war. In fact, the only real candidate I have is the 1938 Signal Shifter! I wanted more power, of course, but can use an amp in the CX contest, so maybe the SS is the way to go. A couple of people have extra third editions (1942) and I may well start with one of those.

BUT, does anyone have an original, in the black wrinkle box, or the second edition, shiny panel and metal dial, they might want to pass on to a good home? I'm sure I wouldn't want to pay for a museum quality unit, just want something I can make work for occasional use.

Pictures are attached.

Thanks,
Wilson

Wilson,

I'm a little ahead of you....

I've had a second edition Meissner Signal Shifter for several years and have used it bearfoot (and with a PP 6L6 amp) in the AWA OT CW Contest. Now I'm starting to work on a better amplifier to go with it. I'm designing my amp around a couple of TZ-20s I have in the junque box.

Have you thought at all about your amp to go with the MSS?

73,
Niel - W0VLZ

Ed,

In my state of shock and awe, I have not yet seen the AES listing..
Have these capacitors been cryogenically treated in a way similar to
the 6L6's I have heard about, or the power cords that have been
offered at some \$450 each?

I am still shaking with anticipation.

Roy
